EVERYTHING FOR THE GARDEN

WE do not pay transportation charges, except where goods are marked post paid.

We do not warrant in any way, express or implied, the contents or the description, quality, productiveness or any other matter, of any seeds sold by us, and we will not in any way be responsible for the crop. If the purchaser does not accept these goods on above terms no sale is made thereof, and he must return them at once and money will be refunded subject to above conditions.

We have every kind of Flower and Vegetable Seed you could wish. Ask for pamphlets on Fern Culture, Care of House Plants, and How to Make a Lawn, Rose Culture, etc.

White Jerusalem Artichokes

Planted and cultivated for the tuber, the same as potatoes. They are remarkable for great productiveness. They need not be dug. If hogs are turned in on them they can easily root the tubers out. One acre will keep from 20 to 30 hogs in fine condition for several months. Said to be a preventative for cholera and other hog diseases. Excellent for fattening if fed with a grain or mash ration. Plant 400 lbs. per acre early in the spring.

Parcel Post, freight or express, 10 lbs. 50c; 50 lbs. \$1.50; 100 lbs. \$2.50. Per lb., prepaid, 20c.

Asparagus

CULTURE—One oz. of seed will produce 300 plants, 1¼ lb. of seed enough plants to set an acre.

Sow early in the spring. Have the rows about 2 feet apart and an inch apart in the row, cover the seed with half an inch of soil. Thin to not less than 2 inches apart. In preparing your permanent bed prepare the ground in the fall by giving it extra heavy coating of manure, then plow the ground very deep which will kill all weed seeds. Lay out your bed 4 ft. between the rows, and 18 in. in the row, plant the roots about 4 inches deep. When your asparagus appears about an inch above the ground start to cultivate. Throw the soil on top of your bed so as to completely cover the growth and keep covering at subsequent cultivations till you have laid your ground into mounds about 16 inches high. Do not cut the first season; cut very lightly the second.

Soak seeds in hot water before sowing.

CEL-O-GLASS

For Windows in Packing Sheds, Barns, Garages, and Outbuildings

Whenever the outbuildings on your farm or country place, village or suburban home need windows, there is need for CEL-O-GLASS.

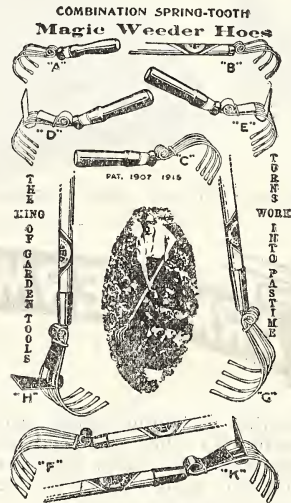

How difficult it is at times to repair broken windowframes in the barn, in hard-to-get-at places that if broken are unsightly. It's worth a lot to have such windows of a glass that is practically non-breakable.

How often have windows in needed places in outbuildings been ignored, because of the cost of carefully built mill-made sash? CEL-O-GLASS makes it an easy matter to have daylight in those dark corners. A simple, homemade frame, a piece of CEL-O-GLASS cut to fit it, staples and a hammer, a strip to finish off the work if you wish it—and your window is ready.

CEL-O-GLASS is good-looking as well as durable—use it for your garage.

Stanley's Bird Repellant

is the one sure cure for troublesome birds. Not only birds, but moles, squirrels and all pests will leave your corn field severely alone if you coat your seed corn with it just before planting. You don't have to wait for it to dry, and it positively will not clog the planter. It is not poisonous and, therefore, will not kill birds or animals, but it WILL keep your cornfields free from damage that runs into money and time, if you have to keep replanting all the time. Large can, enough for 2 bu. of seed-corn (8 to 10 acres), \$1.50. Half-size can, \$1.00.

GEISLER'S BIRD SEED AND REMEDIES

THE "OUT-U-KUM" WEED PULLER

An Entirely New Principle

A slight Push and Pull thoroughly loosens the surrounding soil and removes not only the weed, but the entire root.

When pushed into the ground, the two points guide the BRIDGE down alongside the weed, loosening the soil from that side. It then crosses under the root disengaging the latter. As the tool is withdrawn the BRIDGE slips up the opposite side of the weed, loosening the ground from that side and engages the head of the weed above the ground. The now thoroughly loosened weed is readily withdrawn in its entirety with little or no clinging soil.

GRAPE DUST (Hammonds)

For use on Vegetables, Roses and Grapes. On Lettuce and Cauliflower in the forcing house, against mildew of the grape onion. Rust or mildew on parsley, muskmelons or other plants. "Grape Dust" is a practical and usually effectual remedy. It has been used 25 years. 5 lb. pkg., \$1.15; postpaid, \$1.25.

A wonderfully effective spray for destroying grubs, maggots and worms which infect TURNIPS, RADISHES, BEETS, CAULIFLOWERS, CABBAGE, ONIONS, etc., and highly recommended for use in combatting CROWN BORERS in strawberries. The root maggot, as well as the strawberry crown borer, is hatched from an egg deposited on the plants by the maggot fly. This fly dislikes the odor of the spray, and will not deposit the eggs where the odor is present. Carco is highly recommended by market gardeners and large growers of vegetables. Is sure death to ants. Half pint, 50c; pint, 75c; quart, \$1.25; gal. \$2.75.

Landscape Gardening

Tropical Effect of Castor Beans (annual) Grown in One Season
(Home of W. C. Thornhill, Wenatchee)

We take your place in the rough and turn it into a beauty spot---grade it, seed it, plant it. Our men are experienced

Let it be understood that to make a complete Landscape job, you must use Annuals and Perennials, such as are listed in this catalogue, and which we grow in large quantities. We will tell you what to plant from seed which will give you more color and variety, lasting through the season, carrying out a more beautiful picture, and at the same time making your job cost less. We are in a position to take care of you in all this work, and ask you to consult with us throughout the season, as to care of same, fertilizers, pruning, and also the care needed in winter.

Window boxes planted to order.

You cannot get a satisfactory planting with just shrubs, for their season of bloom is usually short. All our evergreens are tried here for endurance of hot summer and winter conditions. See us by all means for a complete job at the lowest cost we can do your work. We tell you what to plant in the fall.
